

Product: FZ-09/MT-09 ¼ Cat Delete Exhaust System
Year: 2013-2020 **Make:** Yamaha **Model:** FZ-09

Parts List	
Exhaust Canister Assembly	1
Mid Pipe (Optional Black)	1
Hardware	
M8 SS Flat washers	3
T-Bolt Clamp	1
M8 x 40mm bolt and nut	1

ATTENTION:

We strongly recommend that this product is installed by a qualified motorcycle mechanic. If you have any doubts as to your ability to perform this installation, please consult with a dealer or repair shop. Be sure to read all instructions before starting installation. Be sure the motorcycle is secure and stable throughout the entire installation.

Installation Instructions

1. Remove your stock exhaust system.

2. For the cut and prep of your stock exhaust you are going to need a die grinder with a cut-off wheel.

NOTE: If a die grinder is unavailable you may use a hacksaw, preferably with a brand new blade.

**Also, you will need a right angle grinder to clean up the cut area.*

3. Stabilize the system and make cut along weld.

4. Grind cut area smooth around the outside.

- *NOTE: You also may need to do some clean up on the inside of the tube.
- 5. Now that you have your stock header unit cut and prepped you can now reinstall this unit.
- 6. Slip onto the stock header unit and attach mounting tab to chassis using the stock bolt and supplied M8 flange nut. You may apply lubricant if necessary.
- 7. Check clearance if muffler is close to the brake pedal you can rotate it downward to clear, if the tip is close to the arm you may space it behind the mount tab with provided washers. You should have about 1/4" clearance.

This installation is complete and you are ready to ride
