ATTENTION:

We strongly recommend that this product is installed by a qualified motorcycle mechanic. If you have any doubts as to your ability to perform this installation, please consult with a dealer or repair shop. Be sure to read all instructions before starting installation. Be sure the motorcycle is secure and stable throughout the entire installation.

Installation Instructions

1. Remove your stock exhaust system.
2. Install the header pipes in place of the factory ones.
3. With the clamp on the Midpipe slip the assembly onto the header pipe, and align canister mounting tab with its location on the foot-peg bracket
4. Check clearance if muffler is close to the brake pedal you can rotate it downward to clear
5. Tighten the clamp to secure the canister/pipe assembly to the header assembly in position.
6. If the tip is close to the swingarm you may space it behind the mount tab with provided washers. You should have about 1/4" clearance, prior to bolting the canister assembly to the footpeg bracket.

This installation is complete and you are ready to ride

We have an ECU flash available for this model, Visit TocePerformance.com for more details!
